SAFETY INFORMATION

Any other use will be deemed improper and may result in severe injury or damage to property. The manufacturer and dealers will not accept any liability for damage caused by improper use. What's more, the device warranty becomes void in such cases.

WARNING

Failure to observe these warnings can lead to electric shock or fire, or damage the charging device.

- If damage occurs while charging, disconnect the charging device immediately from the power mains, if possible by switching off the mains fuse/circuit breaker. Do not touch any electrically live parts.
- Never operate the device near ex-plosive vapours or gases, switching operations within the device can generate tiny electric.
- Never touch the contact surfaces of the charging device. Do not insert any objects into the charging equipment connector faces.
- ◆ Do not attempt to modify or repair your charging device in any way yourself. Never open the housing, and do not make any changes to the adapters and/or extension cables.
- ◆ Do not plug the device into power outlets through which water could ingress the device. Do not immerse the charging device in water.
- ◆ Never disconnect the device connectors while the device is electrically live (i. e. while charging a vehicle), As this can lead to fouling of the connector plug contacts and damage the charging electronics. Always stop the charging process first at the controls inside the vehicle.
- Protect the plug connectors and power sockets against humidity and moisture. Always keep the plugs and the vehicle end coupling dry. Unplugged connectors are not watertight. Always cover them with the protective caps when not in use.
- Do not let children play with the packaging material or the charging device

PRODUCT INFORMATION

Power and Vehicle connector

NEMA 14-50

Type 1(SAEJ1772 North American Standard)

Type 2 (IEC62196-2 European Standard)
Type GB (GB/T20234 China Standard)

Model number definition

 $\begin{array}{c|cccc} \underline{\mathsf{EVE}} & \square & \square & \square & \square \\ \hline \bigcirc & \boxed{2} & \boxed{3} & \boxed{4} \end{array}$

	Classification	Symbol	Meaning of the symbol
1	Basic type	EVE	E series EV charger
		07	1-phase 32A
	② Rated power	11	3-phase 16A
2		12	1-phase 48A
		22	3-phase 32A
3	Charging modes	W	Mode 3
		Blank	Type2(IEC62196-2)
4	Charging interface	U	Type1(SAE J1772)
	interrace	G	GB(GB/T20234)

Spectifications

Phase Number	1-phase		3-ph	ase
Product Model	EVE07W	EVE12W	EVE11W	EVE22W
Rated Voltage	AC110	V/240V	AC4	V00V
Input Frequency	50/60Hz			
Max.output Current	32A	48A	16A	32A
Max.output Power	7.7kW	11.5kW	11kW	22kW
Cable Specification	3x6mm²	8AWG	5x2.5mm ²	5x6mm ²

Protection

Over voltage protection	Yes
Under voltage protection	Yes
Over load protection	Yes
Short circuit protection	Yes
Leakage protection	Yes
Over-temp protection	Yes
Lightning protection	Yes

Function and Accessory

LED indicators	Yes
LCD screen	3.0-inch
RCMU	Type B (AC 30mA+DC 6mA)
Current adjustment	Yes
RFID	Yes
WIEI/Bluetooth	Vas (WIEL2 4GHz)

Working environment

Protection degree	IP 65	
Operation temperature	-30℃ ~60℃	
Relative humidity	≤95%RH	
Operating elevation limit	≤2000m	
Cooling	Natural air cooling	
Standby power consumption	<5W	

Mechanical parameters

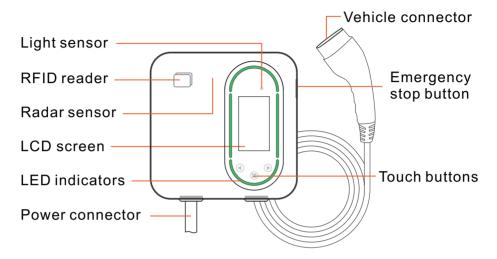

Charging cable	5m (Standard configuration)
Control box	HxWxD=180mm*180mm*70mm
Weight	≤6kg
Colour&Material	White/Black:PC

Standard&Certificate

Standard	IEC 61851 ; GB/T18487
Certificate	CE,RoHS

OPERATION

Overview

LED indicators

Status	Power			Charging	Setting
	On			Standby	Mode
Indicator Light	Light — Light — Meteor		Breathing	Light	
Status	Reservation	Waiting	Charging	Charging	Fault
	Charging	Car Signal	Finished	Mode	Mode
Indicator Light	Meteor	Breathing	Light	↓ ↓ Meteor	Flashing

Touch buttons

LCD screen

The LCD screen of the device can view status, safety warnings, charging records, and settings.

Icon	Connotation	Icon	Connotation
*	Bluetooth enable	3	Human motion
*	Bluetooth connected	7	Reservation enable
∻	Wi-Fi connected	1	PIN lock enable
₹	Wi-Fi exchange data	<u></u>	Grounding connected

Status display

Charging Standby

Touch button

- No reaction
- Enter [Charging history] page.
- Enter [Settings] page, if PIN is enabled, enter the [Unlock] page.

Reservation charging

Swipe RFID, use APP or enter PIN to skip countdown for charging.

Touch button

- No reaction
- No reaction
 - Enter [Unlock] page, unlock and start charging.

Waiting Car Signal

During the process of waiting for the vehicle signal, step 1 (green circle) remains on and step 2 flashes.

Touch button

- No reaction
- No reaction
- No reaction

Status display

Charging Mode-1

Touch button

- No reaction
- Enter [Charging Mode-2] page.
- No reaction

Charging Mode-2

Display voltage and current of each phase separately, charging power, temperature, and ambient brightness.

Touch button

- Enter [Charging Mode-1] page.
- No reaction
- No reaction

Charging Finished

Display consumption and total charging time.

Touch button

- No reaction
- No reaction
- No reaction

Fault Mode

Display fault information, fault codes, and handling methods.

Touch button

- No reaction
- No reaction
- Enter [Settings] page, if PIN is enabled, enter the [Unlock] page.

Setting display

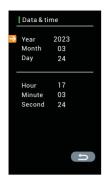

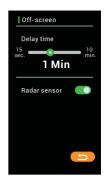

Button function description

- Move the cursor up or left, it will be displayed in orange. If the setting is numerical parameter, the button function is reduced.
- Move the cursor down or right, it will be displayed in orange. If the setting is numerical parameter, the button function is increase.
- Confirm the selection of the orange item. If the setting is on/off, the button function is on or off.

Data&time

If the device is used for the first time or has not been used for more than 20 days, please set the date and time after turning it on. Incorrect time will affect the scheduled charging function.

Display and brightness

This suggestion is to use auto-brightness, which will automatically adjust the appropriate LCD screen brightness according to the ambient brightness.

Off-screen

Turn off the screen after the set delay time without touching the button. If the radar sensor is turned on, the LCD screen will light up when the human body is within 5 meters of the device, and the icon on the status display page will light up.

PIN setting

When the PIN is turned on, entering the menu requires entering the PIN, and the icon on the status display page will light up.

If you forget your PIN, touch the button, use RFID or APP to unlock, enter the [PIN setting] page of the settings menu, close the PIN or reset the PIN.

Current adjustment

Set appropriate charging current according to the capacity of the power grid.

If the 1-Phase mode is enabled, the three-phase device forcibly uses L1 live wire, L2 and L3 do not output during the charging process.

Reservation

Reservation can be achieved between the start and end times, and it needs to meet the week setting. After the reservation is enabled, and the icon on the status display page will light up.

Charge mode

Plug & charge is enabled, start charging when the charging connector is connected to the vehicle, no other authorization required.

Charging history

The device can store up to 30 records, which can be viewed through the left and right buttons (turn orange and touch the button).

Note: After accumulating 30 charging records, the old records will be overwritten one by one.

Grounding selection

The charger is installed in an ungrounded or poorly grounded power grid, and grounding can be turned off.

RFID management

RFID can be added or disabled, with maximum of three cards added and saved.

Add RFID: The cursor stays on the ID option, and after touching the button, the ID will turn orange. Remove the RFID that needs to be added and approach the device's card swiping area.

Wi-Fi

The device needs to set wireless name and password through the APP, and can also set static IP address.

Load & communication

The device can be communicated through PLC (power line carrier) or ModBus TCP in WIFI mode. But the basic model does not support PLC. After enabling load balancing, control the current during the charging process through the enabled communication mode.

Note: After enabling load balancing, the app will not be able to connect to devices

Start charging

- 1. Connect the power plug of the charger to a grounded outlet, wait for the device to enter charging standby.
- 2. Couple the vehicle-end connector of the device to the vehicle's charging socket.
- 3. Enter the reservation page(If reservation is enabled). Swipe RFID, use APP or enter PIN to skip countdown for charging.
- 4. Wait for the vehicle authorization signal, and then enter the charging mode.

Reservation charging

Waiting Car Signal

Charging Mode

Stop charging

- 1. Stop the charging process at the controls inside the vehicle, this releases the lock on vehicle's charging coupling.
- 2. First disconnect the connector coupled to the vehicle, then unplug the connector plug from the power socket or the charging station.

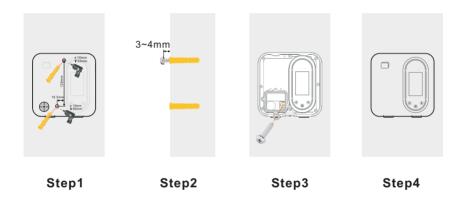

INSTALLATION

- ① Cardboard
- 2 Self-tapping Screws
- 3 Silicone Pad
- **4** Expansion Plugs

Installation steps

Before installation, please ensure that the power is cut off.

- Step 1: Please drill holes on the wall according to the size of the holes on the **cardboard** and punch in the **expansion plugs**.
- Step 2: Install the upper **self-tapping screw**, and reserve about 3 to 4mm threads outside the wall.
- Step 3: Remove the decorative panel and wiring cover of the device, and hang the device onto the upper screw. Align the plastic expansion position inside the wiring compartment, cover the lower self-tapping screw with a silicone pad, and tighten it.
- Step 4: Check that the sealing strip of the wiring compartment is intact and close the wiring cover. Lock with screws, install the decorative panel, and tighten the screw.

FAULT HANDLING

The device is automatically protected in the event of the fault. The fault information and handing methods are as follows.

Fault information	Handling method
Both the LED and LCD screen are not on	 Check whether the power supply and distribution are normal. Check breaker is tripped, and open the breaker after troubleshooting.
LED on, and LCD screen not on	◆LCD connection cable is loose or LCD is damaged.
Waiting car signal for a long time	 Battery of car is full, the car is in the reservation delay charging mode, or the vehicle connector is not properly connected. Disconnect and reconnect the vehicle connector.
Ground Fault Code: 0001	◆The device is not grounded, check the input power cable.
RCMU Fault Code: 0002	◆The RCMU is damaged and needs to be returned to the factory for repair.
Over voltage Code: 0004	◆Check whether the input cable is connected correctly.◆Check whether the input voltage is abnormal.
Under voltage Code: 0008	 Check whether the input cable is reliably connected. Check whether the input voltage is abnormal.
Leakage Fault Code: 0010	 ◆Check whether the vehicle connector and it's cable are damaged or wet. ◆Recover after pulling out the mains connector.

Fault information	Handling method
Over current Code: 0020	 ◆Check whether the vehicle connector is correctly connected. ◆Check whether the on-board charger is normal.
CP voltage Code: 0040	 ◆Check the vehicle connector and charging socket of EV. ◆Disconnect and reconnect the vehicle connector.
Short circuit Code: 0080	◆Check whether the vehicle connector and it's cable are damaged or wet.
Over temperature Code: 0100	◆Check power plug and socket are in close contact. ◆Check the cable diameter of the socket.
Emergency stop button pressed Code: 8000	 ◆The STOP button has been pressed. ◆If no fault occurs , Please press the button again to reset the charger.

MAINTENANCE

- Check whether the join point of the input terminal is in good contact and whether there is any abnormality.
- ♦ If plugs get wet, allow them to dry before using them.
- ♦ Always fit the device with the protective caps when not plugged in.

ELECTRIC AND HYBRID VEHICLES

Model: EVExxW series

Rev. 0.3
